

React Dev Tools

- Browser Extension
- Great for debugging React issues in browser
- Continue to debug HTML/CSS as normal

Installing

- Go to Chrome Extension "store"
 - Firefox as a version as well
- Install extension

Using React Dev Tools

- Two tabs in browser dev tools
 - Components
 - Lets you inspect React components
 - read and update state
 - Profiler
 - Lets you record a set of interactions
 - See where your render time is spent
